Biosynthesis and Degradation

Biosynthetic pathway of desmosines in elastin.
By G. Francis, R. John & J. Thomas 45

The metabolism of amino acids in the bovine lens. Their oxidation as a source of energy.
By P. Trayhurn & R. van Heyningen 67

Cholesterol feeding alters the metabolism of thoracic-duct lymph lipoprotein cholesterol in rabbits but not in rats.
By T. G. Redgrave 109

Studies on bone matrix glycoproteins. Incorporation of [1-^{14}C]glucosamine and plasma [^{14}C]glycoprotein into rabbit cortical bone.
By J. T. Triffitt & M. Owen 125

The stereochemistry of hydrogen elimination from C-7 during biosynthesis of ecdysones in insects and plants.
By I. F. Cook, J. G. Lloyd-Jones, H. H. Rees & T. W. Goodwin 135

Ribonucleic acid synthesis in porphyric rat liver induced by 3,5-dicarbethoxy-1,4-dihydrocollidine.
By H. Nawata & K. Kato 209

Bioenergetics

Biochemical effects of the hypoglycaemic compound pent-4-enoic acid and related non-hypoglycaemic fatty acids. Effects of the free acids and their carnitine esters on coenzyme A-dependent oxidations in rat liver mitochondria.
By P. C. Holland & H. S. A. Sherratt 157

Biochemical effects of the hypoglycaemic compound pent-4-enoic acid and related non-hypoglycaemic fatty acids. Effects of their coenzyme A esters on enzymes of fatty acid oxidation.
By P. C. Holland, A. E. Senior & H. S. A. Sherratt 173

Calcium ion-dependent *p*-nitrophenyl phosphate phosphatase activity and calcium ion-dependent adenosine triphosphatase activity from human erythrocyte membranes.
By A. F. Rega, D. E. Richards & P. J. Garrahan 185

Respiration-driven proton translocation in *Escherichia coli* (*Short Communication*).
By H. G. Lawford & B. A. Haddock 217

Subcellular Structures

The effect of Triton WR-1339 on the subcellular distribution of Trypan Blue and ^{125}I-labelled albumin in rat liver.
By M. Davies 57

PAGE

Purification of ^{14}C-labelled deoxyribonuclease II from HeLa S3 lysosomes and its use as a marker for the study of nuclear deoxyribonuclease II.
By H. Slor 83

Cellular Interactions and Control Processes

Effect of the exotoxin of *Bacillus thuringiensis* on normal and ecdysone-stimulated ribonucleic acid polymerase activity in intact nuclei from the fat-body of *Sarcophaga bullata* larvae.
By T. J. C. Beebee & R. P. M. Bond 1

Effect of an exotoxin from *Bacillus thuringiensis* on deoxyribonucleic acid-dependent ribonucleic acid polymerase in nuclei from adult *Sarcophaga bullata*. Unusual behaviour of eukaryotic polymerases to inhibitors.
By T. J. C. Beebee & P. M. Bond 9

Transport of methionine and proline by rat liver slices and the effect of certain hormones.
By J. C. Crawhall & P. Purkiss 15

Nuclear binding of oestradiol-17β and induction of protein synthesis in the rat uterus during postnatal development.
By D. Sömjen, G. Sömjen, R. J. B. King, A. M. Kaye & H. R. Lindner 25

Uptake and release of bilirubin by skin.
By C. L. Kapoor, C. R. Krishna Murti & P. C. Bajpai 35

The uptake and efflux of L-phenylalanine and L-tyrosine from rat brain cerebral-cortex slices.
By P. Joanny, J.-P. Natali, H. Hillman & J. Corriol 77

Steroid-binding properties and stabilization of cytoplasmic glucocorticoid receptors from rat thymus cells.
By P. A. Bell & A. Munck 97

The fusion of erythrocytes by fatty acids, esters, retinol and α-tocopherol.
By Q. F. Ahkong, D. Fisher, W. Tampion & J. A. Lucy 147

Effect of vitamin A deprivation on the cholesterol side-chain cleavage enzyme activity of testes and ovaries of rats (*Short Communication*).
By M. Jayaram, S. K. Murthy & J. Ganguly 221

Development

Oscillations of enzyme activities during the cell-cycle of a glucose-repressed fission-yeast *Schizosaccharomyces pombe* 972h.
By R. K. Poole & D. Lloyd 195

PAGE

Metabolism in Whole Organisms

Cleavage of malyl-coenzyme A into acetyl-coenzyme A and glyoxylate by *Pseudomonas* AM 1 and other C_1-unit-utilizing bacteria.
By A. R. Salem, A. J. Hacking & J. R. Quayle 89

PAGE

Glycolytic isoenzymes and glycogen metabolism in regenerating liver from rats on controlled feeding schedules.
By R. J. Bonney, H. A. Hopkins, P. R. Walker & V. R. Potter 115

Contents of Volume 136, No. 2

PAGE

Biosynthesis and Degradation

The effect of trimethoprim on macromolecular synthesis in *Escherichia coli*. General effects on ribonucleic acid and protein synthesis.
By R. J. Smith & J. E. M. Midgley 225

The effect of trimethoprim on macromolecular synthesis in *Escherichia coli*. Ribosome maturation in RC^{str} and RC^{rel} strains.
By J. E. M. Midgley & R. J. Smith 235

The effect of trimethoprim on macromolecular synthesis in *Escherichia coli*. Regulation of ribonucleic acid synthesis by 'magic spot' nucleotides.
By R. J. Smith & J. E. M. Midgley 249

Identification and measurement of the folates in sheep liver.
By W. S. Osborne-White & R. M. Smith 265

Folic acid metabolism in vitamin B_{12}-deficient sheep. Depletion of liver folates.
By R. M. Smith & W. S. Osborne-White 279

The synthesis of pteroylpolyglutamates by sheep liver enzymes *in vitro*.
By J. M. Gawthorne & R. M. Smith 295

Inhibition of protein synthesis by *N*-methyl-*N*-nitrosourea *in vivo*.
By P. Kleihues & P. N. Magee 303

Biosynthesis and degradation of saccharopine, an intermediate of lysine metabolism.
By F. C. I. Fellows 321

Lysine metabolism in mammals.
By F. C. I. Fellows & M. H. R. Lewis 329

Mechanism of action of a microsomal inhibitor of protein synthesis potentiated by oxidized glutathione.
By H. T. R. Rupniak & R. V. Quincey 335

The formation of choline *O*-sulphate by *Pseudomonas* $C_{12}B$ and other *Pseudomonas* species.
By J. W. Fitzgerald 361

PAGE

Cellular reactions of O^6-methylguanine, a product of some alkylating carcinogens.
By C. T. Miller, P. D. Lawley & S. A. Shah 387

Biosynthetic studies on aromatic carotenoids. Biosynthesis of chlorobactene.
By S. E. Moshier & D. J. Chapman 395

S-Adenosyl-L-methionine–cycloartenol methyltransferase activity in cell-free systems from *Trebouxia* sp. and *Scenedesmus obliquus*.
By Z. A. Wojciechowski, L. J. Goad & T. W. Goodwin 405

Carotenoid biosynthesis in *Rhodopseudomonas spheroides*. *S*-Adenosylmethionine as the methylating agent in the biosynthesis of spheroidene and spheroidenone.
By R. K. Singh, G. Britton & T. W. Goodwin 413

The tritium isotope effect of *sn*-glycerol 3-phosphate oxidase and the effects of clofenapate and *N*-(2-benzoyloxyethyl)norfenfluramine on the esterification of glycerol phosphate and dihydroxyacetone phosphate by rat liver mitochondria.
By M. Bowley, R. Manning & D. N. Brindley 421

Lack of inhibition by L-1-chloro-4-phenyl-3-toluene-*p*-sulphonamidobutan-2-one (L-1-tosylamido-2-phenylethyl chloromethyl ketone) of the formation of bacterial polypeptide chain initiation complex (*Short Communication*).
By J. Jonák & B. F. C. Clark 433

Stability of clearing-factor lipase in rat adipose tissue (*Short Communication*).
By P. Davies & D. S. Robinson 437

Subcellular Structures

The effect of magnesium ions on the dimethylaniline oxidation rate and electron transfer in liver microsomal fraction.
By A. I. Archakov, I. I. Karuzina, I. S. Kokareva & G. I. Bachmanova 371

PAGE

Cellular Interactions and Control Processes

Phosphopyruvate carboxylase induction by L-tryptophan. Effects on synthesis and degradation of the enzyme.
By F. J. Ballard & M. F. Hopgood 259

Activation of volatile fatty acids in bovine liver and rumen epithelium. Evidence for control by autoregulation.
By R. Ash & G. D. Baird 311

A possible role of adenylate cyclase in the long-term dietary regulation of insulin secretion from rat islets of Langerhans.
By S. L. Howell, I. C. Green & W. Montague 343

PAGE

Clearing-factor lipase in muscle and adipose tissue of pigs.
By M. Enser 381

The role of multivalent cations in the uptake and oxidation of glucose by *Pseudomonas fluorescens* (*Short Communication*).
By C. A. Walker & N. N. Durham 429

The potentiation of growth hormone by asparagine and tryptophan (*Short Communication*).
By J. H. Ottaway 441

Development

Hydrolysis of GM_1-ganglioside by human liver β-galactosidase isoenzymes.
By M. W. Ho, P. Cheetham & D. Robinson 351

Contents of Volume 136, No. 3

PAGE

Biosynthesis and Degradation

Influence of mitochondria on phospholipid synthesis in preparations from rat liver.
By J. B. Roberts & F. L. Bygrave 467

Ribosome precursors accumulated by *Escherichia coli* during incubation with cobalt chloride.
By M. R. Blundell & D. G. Wild 565

Thymidine metabolism in regenerating rat liver one to two hours after partial hepatectomy.
By M. G. Ord & L. A. Stocken 571

Biosynthesis of immunoglobulin A (IgA). Secretion and addition of carbohydrate to monomer and polymer forms of a mouse myeloma protein.
By E. Della Corte & R. M. E. Parkhouse 589

Biosynthesis of immunoglobulin A (IgA) and immunoglobulin M (IgM). Requirement for J chain and a disulphide-exchanging enzyme for polymerization.
By E. Della Corte & R. M. E. Parkhouse 597

Biosynthesis of immunoglobulin A (IgA) and immunoglobulin M (IgM). Control of polymerization by J chain.
By R. M. E. Parkhouse & E. Della Corte 607

Effects of clofibrate on the metabolism of progesterone and oestradiol in rat liver microsomal fraction.
By K. Einarsson, J.-Å. Gustafsson & K. Hellström 623

PAGE

Synthesis and degradation of mitochondrial components in hypertrophied rat heart.
By R. Albin, R. T. Dowell, R. Zak & M. Rabinowitz 629

The degradation of L-histidine in the rat. The formation of imidazolylpyruvate, imidazolyl-lactate and imidazolylpropionate.
By A. V. Emes & H. Hassall 649

The turnover rate of rabbit urinary Tamm–Horsfall glycoprotein.
By A. M. S. Grant & A. Neuberger 659

Inhibition by ricin of protein synthesis *in vitro*. Ribosomes as the target of the toxin.
By L. Montanaro, S. Sperti & F. Stirpe 677

The activity of deoxyribonucleic acid polymerase and deoxyribonucleic acid synthesis in nuclei from brain fractionated by zonal centrifugation.
By M. A. Stambolova, D. Cox & A. P. Mathias 685

Metabolic adaptations during lactogenesis. Fatty acid and lactose synthesis in cow mammary tissue.
By R. W. Mellenberger, D. E. Bauman & D. R. Nelson 741

Dietary protein intake and skeletal-muscle protein metabolism in rats. Studies with the ammonium chloride-wash fraction from crude polyribosomes of well-nourished and protein-depleted rats.
By S. D. Alexis & V. R. Young 773

PAGE

Synthesis of mitochondrial protein in the flight muscles of the Colorado beetle. Differentiation *in vivo* between extra- and intra-mitochondrial contributions to the amino acid incorporation into mitochondrial protein.
By A. K. M. Bartelink & C. A. D. de Kort 795

Inhibition by ricin of protein synthesis *in vitro*: 60S ribosomal subunit as the target of the toxin (*Short Communication*).
By S. Sperti, L. Montanaro, A. Mattioli & F. Stirpe 813

Preferential synthesis of a membrane-associated protein by free polyribosomes (*Short Communication*).
By D. Lowe & T. Hallinan 825

Bioenergetics

Proton translocation coupled to quinol oxidation in ox heart mitochondria.
By H. G. Lawford & P. B. Garland 711

The photochemical activities and electron carriers of developing barley leaves.
By M. Plesničar & D. S. Bendall 803

Subcellular Structures

Phosphatidylinositol kinase. A component of the chromaffin-granule membrane.
By J. H. Phillips 579

Rapid transport of phosphatidylcholine occurring simultaneously with protein transport in the frog sciatic nerve.
By T. Abe, T. Haga & M. Kurokawa 731

Cellular Interactions and Control Processes

The interrelationship of the concentration of hydrogen ions, bicarbonate ions, carbon dioxide and calcium ions in the regulation of renal gluconeogenesis in the rat.
By G. A. O. Alleyne, H. Flores & A. Roobol 445

Relationships between concentration of hepatic intermediary metabolites and induction of the key glycolytic enzymes *in vivo*.
By J. M. Gunn & C. B. Taylor 455

Control of 5-aminolaevulinate synthetase activity in *Rhodopseudomonas spheroides*. The involvement of sulphur metabolism.
By A. Neuberger, J. D. Sandy & G. H. Tait 477

Control of 5-aminolaevulinate synthetase activity in *Rhodopseudomonas spheroides*. The purification and properties of an endogenous activator of the enzyme.
By A. Neuberger, J. D. Sandy & G. H. Tait 491

PAGE

Stimulation of ribonucleic acid polymerase activity *in vitro* by prostatic steroid–protein receptor complexes.
By P. Davies & K. Griffiths 611

Ethanol administration and the relationship of malonyl-coenzyme A concentrations to the rate of fatty acid synthesis in rat liver.
By R. W. Guynn, D. Veloso, R. L. Harris, J. W. R. Lawson & R. L. Veech 639

Effect of methylglyoxal bis(guanylhydrazone) on polyamine metabolism in normal and regenerating rat liver and rat thymus.
By E. Hölttä, P. Hannonen, J. Pispa & J. Jänne 669

Stimulation by vasopressin of glycogen breakdown and gluconeogenesis in the perfused rat liver.
By D. A. Hems & P. D. Whitton 705

Identity of 'acid' β-glucosidase and glucocerebrosidase in human spleen.
By M. W. Ho 721

Glucocerebrosidase: reconstitution from macromolecular components depends on acidic phospholipids (*Short Communication*).
By M. W. Ho & N. D. Light 821

Development

Quantitative studies on ferredoxin in greening bean leaves.
By B. G. Haslett, R. Cammack & F. R. Whatley 697

Vitamin A economy of the developing chick embryo and of the freshly hatched chick.
By P. S. Joshi, S. N. Mathur, S. K. Murthy & J. Ganguly 757

Age-dependent arylsulphatase and sulphotransferase activities in the southern armyworm: a possible insect endocrine regulatory mechanism? (*Short Communication*).
By R. S. H. Yang, J. G. Pelliccia & C. F. Wilkinson 817

Metabolism in Whole Organisms

Microbiological transformation of steroids. 1-Dehydrogenation of 17,21-dihydroxypregn-4-ene-3,20-dione with *Glomerella cingulata*.
By L. Costa Pla 501

The design of experiments using isotopes for the determination of the rates of disposal of blood-borne substrates *in vivo* with special reference to glucose, ketone bodies, free fatty acids and proteins.
By D. F. Heath & R. N. Barton 503

PAGE

The effects of starvation, environmental temperature and injury on the rate of disposal of glucose by the rat.
By D. F. Heath & P. L. Corney 519

The interconversion and disposal of ketone bodies in untreated and injured post-absorptive rats.
By R. N. Barton 531

The irreversible disposal rate of free fatty acids in the plasma of fed and starved rats.
By V. J. Cunningham 545

Plasma lipoproteins and the synthesis and turnover of plasma triglyceride in normal and genetically obese mice.
By D. M. W. Salmon & D. A. Hems 551

PAGE

The effect of thiourea on ureide metabolism in *Neurospora crassa*.
By J. Nirmala & K. Sivarama Sastry 749

Species differences in the metabolism of norephedrine in man, rabbit and rat.
By J. E. Sinsheimer, L. G. Dring & R. T. Williams 763

Qualitative and quantitative aspects of the biosynthesis of ribonucleic acid and of protein in the liver and the lung of the Syrian golden hamster.
By H. Witschi 781

The effects of diethylnitrosamine on ribonucleic acid and protein synthesis in the liver and lung of the Syrian golden hamster.
By H. Witschi 789

Contents of Volume 136, No. 4

PAGE

Biosynthesis and Degradation

Chloroplast ribosomal ribonucleic acid synthesis in cultured spinach leaf tissue.
By P. Detchon & J. V. Possingham 829

Biosynthesis of respiratory-tract mucins. Incorporation of radioactive precursors into glycoproteins by canine tracheal explants *in vitro*.
By D. B. Ellis & G. H. Stahl 837

Biosynthesis of respiratory-tract mucins. A comparison of canine epithelial goblet-cell and submucosal-gland secretions.
By G. H. Stahl & D. B. Ellis 845

Association of nascent polypeptide with 30S ribosomal subunits.
By M. Cannon, M. A. A. Mirza & M. L. M. Anderson 859

Association of nascent polypeptide and transfer ribonucleic acid with 30S ribosomal subunits.
By M. A. A. Mirza, M. Cannon & M. L. M. Anderson 865

The control of synthesis of bacterial cell walls. Interaction in the synthesis of nucleotide precursors.
By R. G. Anderson, L. J. Douglas, H. Hussey & J. Baddiley 871

The diurnal response of muscle and liver protein synthesis *in vivo* in meal-fed rats.
By P. J. Garlick, D. J. Millward & W. P. T. James 935

PAGE

Alterations in glycosaminoglycan metabolism in β-aminopropionitrile-treated chick embryos.
By M. J. Elders, J. D. Smith, W. G. Smith & E. R. Hughes 985

Comparison of the turnover patterns of total and individual muscle proteins in normal mice and those with hereditary muscular dystrophy.
By S. E. Kitchin & D. C. Watts 1017

The metabolism of nitrilotriacetate by a pseudomonad.
By R. E. Cripps & A. S. Noble 1059

A novel assay for the biosynthesis of sulphated polysaccharide and its application to studies on the effects of somatomedin on cultured cells.
By Å. Wasteson, K. Uthne & B. Westermark 1069

Biosynthesis of carnitine and 4-*N*-trimethylaminobutyrate from lysine.
By R. A. Cox & C. L. Hoppel 1075

Biosynthesis of carnitine and 4-*N*-trimethylaminobutyrate from 6-*N*-trimethyl-lysine.
By R. A. Cox & C. L. Hoppel 1083

Role of mixed-function amine oxidase in *N*-hydroxylation of 2-acetamidofluorene by hamster liver microsomal preparations (*Short Communication*).
By P. D. Lotlikar, K. Wertman & L. Luha 1137

PAGE

Bioenergetics

Studies on selenium incorporation into, and electron-transfer function of, liver microsomal fractions from normal and vitamin E-deficient rats given phenobarbitone.
By C. P. J. Caygill, A. T. Diplock & E. H. Jeffery 851

The reconstitution of oxidase activity in membranes derived from a 5-aminolaevulinic acid-requiring mutant of *Escherichia coli*.
By B. A. Haddock 877

Chloride-dependent uncoupling mediated by oligomycin in rat liver mitochondria.
By N. Ariel & Y. Avi-Dor 911

The effects of iron-limited growth on the reduced nicotinamide–adenine dinucleotide dehydrogenase activity and the membrane proteins of *Candida utilis* mitochondria.
By R. A. Clegg & J. E. Skyrme 1029

The occurrence of a stepwise-decreasing respiration rate during oxidative assimilation of different substrates by resting *Klebsiella aerogenes* in a system open to oxygen (*Short Communication*).
By H. Degn, M. Lilleør & J. J. L. Iversen 1097

Subcellular Structures

Electrokinetic properties of isolated cerebral-cortex synaptic vesicles.
By J. McLaughlin, K. R. Case & H. B. Bosmann 919

Criteria for identifying a myelin-like fraction from developing brain (*Short Communication*).
By H. C. Agrawal, J. L. Trotter, R. F. Mitchell & R. M. Burton 1117

Calcium transport and phospholipid composition of microsomal fractions from denervated rat gastrocnemius (*Short Communication*).
By B. P. Hughes & R. Yasin 1129

Cellular Interactions and Control Processes

The effects of chemical porphyrogens and drugs on the activity of rat liver tryptophan pyrrolase.
By A. A.-B. Badawy & M. Evans 885

Output of [^{14}C]adenine nucleotides and their derivatives from cerebral tissues. Tetrodotoxin-resistant and calcium ion-requiring components.
By I. Pull & H. McIlwain 893

PAGE

Isoenzyme patterns in parenchymal and non-parenchymal cells isolated from regenerating and regenerated rat liver.
By R. J. Bonney, P. R. Walker & V. R. Potter 947

The role of protein kinase activation in the control of steroidogenesis by adrenocorticotrophic hormone in the adrenal cortex.
By M. C. Richardson & D. Schulster 993

Effects of membrane depolarization on nicotinamide nucleotide fluorescence in brain slices.
By P. Lipton 999

Intra-axonal transport and turnover of neurophysins in the rat. A proposal for a possible origin of the minor neurophysin component.
By G. D. Burford & B. T. Pickering 1047

A model for the passage of the neurohypophysial hormones and their related proteins through the rat neurohypophysis.
By G. D. Burford, P. Clifford, C. W. Jones & B. T. Pickering 1053

Induction of δ-aminolaevulinate synthetase under environmental-stress conditions.
By E. Amruthavalli & T. Ramasarma 1091

Progesterone and the metabolic control of the lactose biosynthetic pathway during lactogenesis in the rat.
By G. Murphy, A. D. Ariyanayagam & N. J. Kuhn 1105

Stimulation of ornithine decarboxylase activity and inhibition of *S*-adenosyl-L-methionine decarboxylase activity in leukaemic mice by methylglyoxal bis(guanylhydrazone) (*Short Communication*).
By O. Heby, S. Sauter & D. H. Russell 1121

Sexual differences in galactose metabolism: galactosyl ceramide galactosidase and other galactosidases in mouse kidney (*Short Communication*).
By Y.-N. Lin & N. S. Radin 1125

The effect of ethylene on [1-^{14}C]glycerol incorporation into phospholipids of etiolated pea stems (*Short Communication*).
By R. F. Irvine & D. J. Osborne 1133

Development

Studies on cystathionase activity in rat liver and brain during development. Effects of hormones and amino acids *in vivo*.
By K. Heinonen 1011

PAGE

Metabolism in Whole Organisms

Identification of flavanone metabolites in rat urine by combined gas–liquid chromatography and mass spectrometry.
By N. P. Das, K. N. Scott & J. H. Duncan 903

The metabolism of benzene by bacteria. Purification and some properties of the enzyme *cis*-1,2-dihydroxycyclohexa-3,5-diene (nicotinamide–adenine dinucleotide) oxidoreductase (*cis*-benzene glycol dehydrogenase).
By B. C. Axcell & P. J. Geary 927

Thymidine kinase and deoxyribonucleic acid metabolism in growing and regenerating livers from rats on controlled feeding schedules.
By H. A. Hopkins, H. A. Campbell, B. Barbiroli & V. R. Potter 955
